

# Education for Sustainable Development

Aiming to create sustainable society in which living creatures and human being can live, we spend our efforts for the re-introduction of the Oriental White Stork with children. And we cultivate our future.

## Kounotori(Stork) KIDS Club

Through outdoor activities for living creatures centered upon the stork, we promote keypersons who can inherit the reintroduction of the Oriental White Stork in the future.

## Environment Education (Furusato Education)

The curriculum has been started to learn about the re-introduction of the Oriental White Stork into wild at the whole elementary and junior high schools in Toyooka. The children nurture the love for Furusato (hometown).

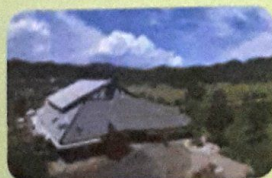

## Let's go local! Tambo (rice fields) no Gakkou (school)

Instructors visiting regional areas, with adults and children together, have a communication with living creatures at your familiar place.

We and  
the storks  
will be waiting  
for you.

## Toyooka Municipal Museum For Oriental White Stork

It is the base to make observation of the stork which live in the expansive free cages as well as to learn the history of the reintroduction of the stork. You can enjoy various outdoor activities such as nature observation of the murmuring streams, Satoyama (outskirts of country) observation. The 3rd Sunday of every month, tambo (rice fields) no Gakkou (school) is held.
